

A world of innovative SOLUTIONS

HYBRID OPTICS INNOVATIONS is committed to globally providing fiber optic, cable management and telecommunication manufacturing solutions to a variety of industries. We are a team with different expertise working towards the common goal of completing customer satisfaction and establishing strategic alliances.

We are dedicated to research and development in the areas where the need for custom application is expanding. This will enable us to build a stronger track record of innovation and commitment. In addition to our in-house research, we collaborate extensively with external research groups in academia and industry.

OPTICAL & TELECOM Manufacturer Agent

HYBRID OPTICS is a highly skilled state-of-the-art professional team that reflects the unique aspects of manufacturing representation and technical expertise. It is specialized in representing line products in photonics, optical testing equipments and telecom applications.

We are committed to serving customers by keeping them focused on its competitive solutions, as well as fully answering and supporting their needs on all aspects and horizons. Our experience in the optical & electrical field has enabled us to widen our network throughout several markets worldwide.
